Final Integrated Project - Organ Donation of Ontario

Our site focuses on drawing attention to the high demand for donors, pursuing viewers to donate using video shorts that are very impactful. A timeline of the growth and events that have been held is shown, along with promoting future events. This shows viewers that many people have been gracious and many lives have been saved due to that but there is still so much more the human race can do to save those in need of a transplant. Through our site we aim to prove to viewers that donating can mean improving someones quality of life, or even better; saving it. Information is given on some organs that are most commonly donated, and viewers may even have an option to fill out a form to become a donor, or get a package sent to them with further information and a way to sign up.

To Get Started

Instructions on how to get project running on a local machine for development and testing.

Look below to deployment section for notes on how to deploy this live.

Requirements

What things you need to install the software and how to install them

(Installation Instructions Here)

Installation Process

How to get development environment up and running, explained in a step by step manner.

STEP 1

Example

STEP 2

Example

(Repeat Until Complete)

End with a full example of the data retrieval process and showing the data retrieved, some kind of demo.

(Automated Tests?)

Running the tests

Here is an explanation of how to run the systems automated tests.

Broken down into end to end tests.

Explanation of tests and why you would run them.

Example shown here.

Tests of coding styles shown here.

Why the tests are run and explanation of them.

Example Shown Here

Deployment

Add additional notes about how to deploy this on a live system
